Connectivity Issues

Slow, delayed, poor connection or video feed:

- Move closer to your WiFi router
- Disconnect any devices you are not actively using from the WiFi
- Close any applications or internet browsers that you are not actively using on the device
- Disconnect from your organization's VPN
- Connect your device directly to the router using a Cat-5 ethernet cable

No Internet Connection:

- Restart your modem and router (i.e. disconnect and reconnect to the power source)

NOTE: *If there is a service outage in your area or region, you will need to contact your internet service provider directly.*
